About

Product Designer with eight years in B2B and B2C SaaS, designing and working on solutions with engineers and PMs, from discovery through handoff on both web and native mobile, always pushing not only for screens but for measurable business outcomes. Increasingly building AI into the workflow where it genuinely boosts research, prototyping and iteration, and leaving it out where it doesn't.

Work Experience

Product Designer at Collaborative Perks ↗

MADRID, SPAIN — 02/2020 → CURRENT

B2B SaaS platform for employee benefits, serving 100+ companies worldwide.

Promoted from Visual Designer in 2020. Own two long-running client platforms from initial discovery calls with clients and 2 PMs, handoff and delivery alongside 3 engineers across two teams and post-launch testing and validation with internal users. Both remain active to this day in addition to new tasks for current clients.

- Designed core features for a client's industrial marketplace allowing factory-to-factory equipment exchange, **avoiding €3.7M** in new equipment purchases.
- On the same platform, redesigned the transaction flow, reducing drop-off by **18%** and cutting completion time from **4.2 to 2.5 minutes** based on analytics.
- Contributed to sustainability outcomes: **41 tonnes** of materials reemployed, **1,400 tonnes** of CO₂ avoided over six years (ongoing).
- Led design and UX for a new module within a client's platform, which drove an increase in **weekly users from 41% to 59%** during the first six months of implementation and launch.
- Co-designed and maintained core platform's **design system**, reducing design to development inconsistencies in both web and native mobile as well as implementation time during sprint cycles.
- Designed and launched a new messaging system ahead of a major platform event, increasing monthly messages from **~3k to ~7k (+130%)** in the first quarter.

Visual Designer at Collaborative Perks ↗

MADRID, SPAIN — 05/2018 → 02/2020

Delivered print and digital assets for clients, from campaign posters, landing pages, banners, to motion graphics (Premiere, After Effects), handling production with external printers. Progressively started taking ownership of larger projects, leading to a promotion into product design.

Education

Google UX Design @ Coursera

Remote — 08/2022 → 04/2023

Web Design & Development @ Gauss Multimedia

Malaga, Spain — 09/2016 → 06/2017

Graphic Design & Prepress @ Gauss Multimedia

Malaga, Spain — 09/2015 → 06/2016
